DATE MAILED: 09/13/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)	
	09/684,861	BILIBIN ET AL. <i>[Signature]</i>	
	Examiner Beth Van Doren	Art Unit 3623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 25 June 2004.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-18 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) <input checked="" type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413)
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Date: _____
3) <input checked="" type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date <u>06/25/2004</u>	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
	6) <input type="checkbox"/> Other: _____

DETAILED ACTION

1. The following is a final office action in response to communications received 06/25/04. Claims 1-9 have been amended. Claims 10-18 have been added. Claims 1-18 are now pending in this application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-12 and 14-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Barni et al. (U.S. 6,064,981).

3. As per claim 1, Barni et al. teaches a shipping management computer system, said computer system programmed to:

for each particular user of a plurality of users, in response to a request by the particular user to ship a particular respective parcel, determine a potential cross-comparison delivery schedule,

said cross-comparison delivery schedule comprising a plurality of service-specific carrier-specific delivery schedules to deliver the particular respective parcel, wherein each service-specific carrier-specific delivery schedule corresponds to a particular delivery service of a plurality of delivery services offered by a particular carrier of a plurality of carriers, wherein each particular user accesses the shipping management computer system over a global communications network using a respective client computer device, and wherein each respective user client computer device has a respective individual electronic connection to the global communications network (See at least figures 1 and 4, column 2, lines 1-10, column 3, lines 12-25 and 35-41, column 4, lines 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein each user has a client terminal which he/she uses to connect to the system over a global communications network. Each user requests via the website information for a particular package (such as ship from, to information) and receives cross-comparison delivery schedule information for different carriers (such as Sea Land and Evergreen)).

4. As per claim 2, Barni et al. teaches a shipping management computer system, said computer system further programmed to:

calculate a shipping rate for each said particular delivery service to deliver the particular respective parcel according to the corresponding service-specific carrier-specific delivery schedule (See at least figures 1 and 4, column 2, lines 1-10, column 3, lines 35-41, column 4, lines 40-55 and 61-65, column 5, lines 15-30 and 35-61, and column 6, lines 1-5, wherein a shipping rate for each particular delivery service is displayed by the system).

5. As per claim 3, Barni et al. teaches the shipping management computer system further programmed to:

generate, in response to a user request for a shipping rate and delivery schedule comparison, a display of an online, interactive prompt to a display monitor configured with the respective user

client computer device of the particular user, said online interactive prompt comprising a simultaneous cross-comparison of said calculated shipping rates, the display of each respective calculated shipping rate corresponding to a display of the corresponding service-specific carrier-specific delivery schedule to deliver the particular respective parcel (See at least figures 1 and 4, column 2, lines 1-10, column 3, lines 12-25 and 35-41, column 4, lines 40-55 and 61-65, and column 5, lines 15-30 and 35-61, which discloses a display).

6. As per claims 4, 5, and 6, claims 4, 5, and 6 recite equivalent limitations to claims 1, 2, and 3, respectively, and are therefore rejected using the same art and rationale as applied in the rejections of claims 1, 2, and 3, respectively.

7. As per claims 7, 8, and 9, claims 7, 8, and 9 recite equivalent limitations to claims 1, 2, and 3, respectively, and are therefore rejected using the same art and rationale as applied in the rejections of claims 1, 2, and 3, respectively.

8. As per claim 10, Barni et al. teaches a shipping management computer system for:
allowing a user to request a package delivery service by providing shipping specifications
(See at least figures 1, 4, and 7-9, column 2, lines 1-10, column 3, lines 12-25 and 35-41, column 4, lines 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein the package delivery service is requested using at least the shipping channel, the ship from, and the ship to specifications of the specific parcel);

receiving said shipping specifications from said user (See at least figures 4 and 7-9, column 2, lines 1-10, column 4, lines 15-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein the user navigates the system using these specifications);

identifying, from a plurality of carriers, a subset of carriers based on said shipping specifications, each of said subset of carriers being capable of satisfying said shipping specifications

by providing said package delivery service to said user (See at least figure 4, column 2, lines 1-10, column 4, lines 15-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein carriers that fit the information are identified);

identifying a first carrier from said subset of carriers and a first set of shipment types provided by said first carrier (See at least figures 4 and 7-9, column 2, lines 1-10, column 4, lines 15-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein a first carrier and a first set of shipment types (such as shipping channel, weight, load type, etc.) are identified);

determining a first set of delivery schedules according to which said first carrier would be able to satisfy said shipping specifications, each one of said first set of delivery schedules corresponding to at least one of said first set of shipment types and comprising a delivery date and a delivery time (See at least figures 4 and 7-9, column 2, lines 1-10, column 4, lines 15-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein the system determines and displays a first set of delivery schedules for the first carrier, such as Sea Land for a full container load and 20 foot container ships on 06/12/99 and must be at the port on 06/10/99 at noon. This would vary by type, as seen in figure 4);

calculating a first set of service charges by said first carrier, each one of said first set of service charges calculated based upon at least one of said first set of shipment types provided by said first carrier (See at least figures 4 and 7-9, column 4, lines 5-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, and column 6, lines 1-20, wherein a service charge is calculated by type for the first carrier);

displaying to the user said first set of delivery schedules, said first set of service charges, said first set of shipment types and said first carrier (See at least figures 4 and 7-9, column 4, lines

Art Unit: 3623

5-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, and column 6, lines 1-20, wherein the information is displayed);

identifying a second carrier from said subset of carriers and a second set of shipment types provided by said second carrier (See at least figures 4 and 7-9, column 2, lines 1-10, column 4, lines 15-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein a second carrier and a second set of shipment types (such as shipping channel, weight, load type, etc.) are identified);

determining a second set of delivery schedules that said second carrier is capable of providing to said user, each one of said second set of delivery schedules corresponding to at least one of said second set of shipment types and comprising a delivery date and a delivery time (See at least figures 4 and 7-9, column 2, lines 1-10, column 4, lines 15-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein the system determines and displays a second set of delivery schedules for the second carrier, such as Evergreen for a full container load and 40 foot container ships on 05/31/99 and must be at the port on 05/12/99 at noon. This would vary by type, as seen in figure 4);

calculating a second set of service charges by said second carrier, each one of said second set of service charges calculated based upon at least one of said second set of shipment types provided by said second carrier (See at least figures 4 and 7-9, column 4, lines 5-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, and column 6, lines 1-20, wherein a service charge is calculated by type for the second carrier); and

displaying to the user said second set of delivery schedules, said second set of service charges, said second set of shipment types and said second carrier (See at least figure 4, column 4, lines 5-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, and column 6, lines 1-20, wherein the information is displayed).

Art Unit: 3623

9. As per claim 11, Barni et al. teaches a shipping management computer system wherein said shipping specifications comprise a package weight, a package size, an origin, and a destination (See at least figures 4 and 7-9, wherein the specifications includes package weight, size, origin, and destination)

10. As per claim 12, Barni et al. discloses a shipping management computer system wherein said shipping specifications further comprise a shipping date (See at least figures 4 and 7-9, wherein the specifications include a shipping date).

11. As per claim 14, Barni et al. teaches a shipping management computer system wherein the potential cross-comparison delivery schedule comprises a delivery date and a delivery time for each of the plurality of services offered by each of the plurality of carriers at which to deliver the particular respective parcel (See at least figures 4 and 7-9, column 2, lines 1-10, column 4, lines 15-22 and 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein a delivery date and time, such as Evergreen for a full container load and 40 foot container, ships on 05/31/99 and must be delivered to the port on 05/12/99 at noon. Package tracking is available and estimated arrival times, see column 5, lines 35-67).

12. As per claims 15 and 16, claims 15 and 16 recite equivalent limitations to claims 2 and 3, respectively, and are therefore rejected using the same art and rationale as applied in the rejections of claims 2 and 3, respectively.

13. As per claim 17, Barni et al. teaches a shipping management computer system, wherein each service-specific carrier-specific delivery schedule corresponds to a schedule for a particular delivery service offered by a particular carrier to deliver the particular respective parcel (See at least figures 1 and 4, column 2, lines 1-10, column 3, lines 12-25 and 35-41, column 4, lines 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein the displayed information corresponds to a particular

service by a particular carrier (such as the shipping channel of port-to-port by Evergreen at a specific size)).

14. As per claim 18, Barni et al. teaches a shipping management computer system, wherein said cross-comparison delivery schedule comprises a service-specific carrier-specific delivery schedule for each particular delivery service of the plurality of delivery services offered by each carrier of the plurality of carriers, wherein each said particular delivery service would provide delivery of the particular respective parcel (See at least figures 1 and 4, column 2, lines 1-10, column 3, lines 12-25 and 35-41, column 4, lines 40-55 and 61-65, and column 5, lines 15-30 and 35-61, wherein the displayed information corresponds to a particular service by a particular carrier (such as the shipping channel of port-to-port by Evergreen at a specific size). Each provides delivery of the parcel).

Claim Rejections - 35 USC § 103

15. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Barni et al. (U.S. 6,064,981).

16. As per claim 13, Barni et al. teaches a shipping management computer system wherein said shipment types include sea port-to-port, air port-to-port, and land point-to-point (See at least figure 4). However, Barni et al. dies not expressly disclose that the first set of shipment types comprises ground shipment, next day-air shipment and express shipment.

Barni et al. discloses the shipment types include sea port-to-port, air port-to-port, and land point-to-point in at least figure 4. Ground shipment, next day-air shipment and express shipment are all well-known types of shipment services in the art. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to include these shipment types as option types in the system of Barni et al. in order to more efficiently allow a customer to evaluate competitive prices for shipping by placing all possible shipping options and prices in one consolidated location. See at least column 2, lines 1-10.

Response to Arguments

17. Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection, as necessitated by amendment.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Thiel (U.S. 5,669,258) discloses comparing carrier-specific data tables and selection of a preferred shipping carrier.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Beth Van Doren whose telephone number is (703) 305-3882. The examiner can normally be reached on M-F, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq Hafiz can be reached on (703) 305-9643. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
